

SRI6PF & SRI20PF Drosophila Incubators

Expanding on our current thermoelectric (Peltier) refrigerated incubators, the SHEL LAB Drosophila units utilize day/night controls along with LED lighting to provide an excellent environment for drosophila culture.

The cabinets are designed with a mechanical convection system to ensure a gentle and even air distribution. A programmable day/night microprocessor temperature controller and over temperature limit control ensure a proper and safe environment.

The energy saving thermoelectric cooling system provides improved temperature uniformity and up to 78% less power than traditional compressor based models.
